### DETAILED ACTION

The following is responsive to Applicant's election and remarks contained therein received Aug. 12, 2003.

The previous restriction requirement mailed July 8, 2003 is **withdrawn** in view of the following new election/restriction requirement.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention: a pharmaceutical composition and method of using said composition wherein the composition comprises (A) compound having activity as an SRI anxiolytic or antidepressant and (B) a neurotransmitter inducing or precursor agent. Applicant is respectfully requested to elect a single compound for (A) and a single compound for (B). Furthermore, to assist the Examiner in the search of the elected compounds, please provide a chemical/structural drawing of each elected compound.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 22 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Cybille Delacroix-Muirheid** whose telephone number is **571-272-0572**. The examiner can normally be reached on 5-4-9.
